

Benjamin D. Bowles

(210)-812-0771 | benjamin.d.bowles@gmail.com | GitHub: [HoleInOneGolfer](#)

Summary

Computer Science undergraduate with a strong foundation in software engineering, full-stack application development, and machine learning. Proficient in Python, Java, C, and JavaScript, with hands-on project experience building interactive web applications, data-driven backends, and PyTorch neural network models. Proven leadership background in managing complex projects and coordinating cross-functional teams. Seeking a software developer internship or full-time position to build scalable solutions and contribute to innovative engineering teams.

Education

Texas Tech University, Lubbock, Texas - Pursuing B.S. in Computer Science with a Minor in Mathematics (Class of 2027)

- Current GPA 3.368
- Dean's Honor List – Fall 2023 | Presidential Merit Scholarship

STEM Academy, L.E.E. High School, San Antonio, Texas - Graduated Summa Cum Laude 2023

Projects

- **Interactive Museum Quiz Kiosk Server**
 - Developed a web-based interactive quiz system for museum kiosks, accessible via iPads, utilizing various JavaScript libraries
 - Engineered the backend logic to parse quiz questions from an Excel file and deliver tailored, exhibit-specific quizzes with immediate feedback
- **Power Output Estimator**
 - Built an analytical machine learning model to determine the power output of a combined cycle power generator based on ambient environmental input parameters
 - Evaluated and optimized model quality, predictive efficiency, and error distribution.
- **Neural Network Weather Predictor**
 - Built and trained custom neural network models using PyTorch to solve complex classification and regression datasets.
 - Implemented rigorous training, validation, and testing methodologies with data preprocessing pipelines and performance evaluation.
 - Wrote formal technical documentation detailing model architecture, parameter optimization, and population accuracy estimation.

Experiences

- **San Antonio Museum of Science and Technology (SAMSAT), Software Developer Internship, 2022-23**
 - Developed the Interactive Museum Quiz Kiosk Server for visitor-facing exhibits
 - Collaborated with staff to deploy web tools and optimize user experience across mobile kiosk devices.
- **Alamo Area Council, Cub Scout Summer Day Camp, Quartermaster, Summer 2023-25**
 - Managed and coordinated supply distribution for staff members, campers, and scouts throughout the duration of camp
- **Eagle Scout Project, Train Playscape for Texas Transportation Museum, San Antonio, TX (Spring 2021)**
 - Managed a budget of almost \$2,000 and coordinated over 30 volunteers/300+ person-hours. Skills used included leadership, project management, logistical organization, and talent management.

Skills

- Python
- Java
- C
- JavaScript
- NodeJS
- HTML5/CSS
- Git/GitHub
- Docker
- Linux
- Data Structures
- Algorithms
- Object Oriented Programming

Certifications

- Certiport Adobe Premiere Pro, 2021
- Certiport Adobe Photoshop, 2021
- Prusa Academy, 3D MODELING IN FUSION 360, 2024
- Microsoft MTA Python, 2022
- FCC Ham Radio General Class License, KG5RKS, Tech. 2017, Gen. 2024
- Texas Boaters Education
- Wildlife First Aid, 2022
